

WAREHOUSE SAFETY NOTICE

All personnel entering the cold store must wear insulated gloves and a high-visibility jacket.

The maximum continuous working period inside the cold store is forty-five minutes, after which a fifteen minute warming break is mandatory.

Report any door seal damage to the shift lead before the next inbound consignment arrives.

EQUIPMENT CHECK RECORD

Forklift batteries are charged overnight and checked each morning before the first shift.

A unit showing less than twenty per cent charge is taken out of service until fully charged.

Charging bays must never be blocked by pallets.
